

Your birth, your way!

41 Weeks

Aghhhhhh!! You are still pregnant!!!! At this point everybody is calling asking if you have had the baby.....well of course you haven't had the baby, or you would have already called them!!!! So, you try not to answer the phone and when you do call anybody the first thing they say is, "did you have the baby?"

We need to do an NST (Non-Stress Tests) and an ultrasound to check the fluid around your baby. We strongly recommend you schedule an induction if you haven't already done so.

Gestational age: _____

Today's weight: _____
